The flashing is used for the protection of flat roofs. Installed in conjunction with a storm collar it prevents that water infiltrates between the storm collar and the upper end of the flashing. The joint between the storm collar and the flue pipe has to be sealed with silicon sealant. It is manufactured completely in 304 stainless steel.

The records, the specifics and the representations of the following catalogue are undemanding. Expo Inox S.p.A. reserves the right to introduce, at any time, the modifications that considers necessary.
