FLESSIBILE ISOLATO POLICOMBUSTIBILE

SENZA PONTI TERMICI FINO A 30 m

- Parete interna doppia parete liscia INOX AISI 316L
- Parete esterna monoparete INOX AISI 304
- Isolamento 25 mm di lana di roccia ad alta densità
 - Semplice da utilizzare
 - Mantiene perfettamente la temperatura grazie all'isolante
 - Limita i rischi da accumulo di fuliggine
 - Ostacola la formazione di condensa nel condotto
 - Migliora il rendimento dell'apparecchio
 - Facilita il tiraggio del camino
 - Il costo di installazione è ridottissimo: essendo pre-coibentato non necessita di ulteriore lavoro di assemblaggio tra il tubo flex e gli isolanti, che avviene generalmente in cantiere a cura dell'installatore

INSULATED FLEXIBLE LINER - POLYCOMBUSTIBLE

WITHOUT THERMAL BRIDGES UP TO 30 m

- Inner pipe: double wall with smooth inner surface in stainless steel AISI 316L
- Outer wall: single wall in stainless steel AISI 304
- Insulation: high density mineral wool 25 mm thickness
 - Easy to use
 - It keeps the temperature perfectly thanks to the insulation
 - It limits the risk of accumulation of soot
 - It hinders the formation of condensation inside the duct
 - It improves the performance of the appliance
 - It facilitates the chimney draft
 - Reduced costs for the installation: as ISO FLEX is pre-insulated it does not require any further manual work between the flex tube and the insulating material, which generally is done on site by the installer

SISTEMA DOPPIA PARETE DW25

Il sistema **doppia parete DW25** è composto da elementi componibili rigidi con finitura lucida BA, realizzati con parete interna in acciaio inox AISI 316L di spessore minimo 0,4 mm e parete esterna in acciaio inox AISI 304, conformi agli standard previsti dalla marcatura CE secondo la normativa EN 1856/1. La coibentazione è realizzata in lana minerale ad alta densità di spessore 25 mm, pressata ed interposta tra le pareti senza elementi di giunzione tra le stesse (ponte termico). Gli elementi modulari hanno innesto classico a bicchiere maschio-femmina calibrato per entrambi le pareti con guarnizione di tenuta a triplice labbro da inserire sulla parete interna, conforme alla normativa europea EN 14241-1, e giunzione meccanica con fascetta di sicurezza.

DOUBLE WALL DW25 SYSTEM

Double wall DW25 system is composed by modular rigid elements with BA surface finish, made with the inner wall of stainless steel AISI 316L BA minimum thickness of 0.4 mm and outer wall in stainless steel AISI 304, according to the standards set out by the European CE mark, EN 1856/1. Insulation made of high density mineral wool 25 mm thickness, pressed and interposed between the walls without connecting elements between the same (thermal junction). The modular elements have classic male-female junction calibrated for both sides, with triple seal lip gasket, conforming to European standard EN 14241-1, and mechanical connection with locking clamp.

SISTEMA DOPPIA PARETE DWC25 PARETE ESTERNA RAME

Il sistema **doppia parete DWC25** è composto da elementi componibili rigidi con finitura lucida in rame naturale, realizzati con parete interna in acciaio inox AISI 316L di spessore minimo 0,4 mm e parete esterna in rame naturale di spessore 0,5 mm, conformi agli standard previsti dalla marcatura CE secondo la normativa EN 1856/1. La coibentazione è realizzata in lana minerale ad alta densità di spessore 25 mm, pressata ed interposta tra le pareti senza elementi di giunzione tra le stesse (ponte termico). Gli elementi modulari hanno innesto classico a bicchiere maschio-femmina calibrato per entrambi le pareti con guarnizione di tenuta a triplice labbro da inserire sulla parete interna, conforme alla normativa europea EN 14241-1, e giunzione meccanica con fascetta di sicurezza.

DOUBLE WALL DWC25 SYSTEM EXTERNAL WALL COPPER

Double wall DWC25 system is composed by modular rigid elements with surface finish in natural copper, made with the inner wall of stainless steel AISI 316L minimum thickness of 0.4 mm and outer wall in natural copper thickness of 0.5 mm, according to the standards set out by the European CE mark, EN 1856/1. Insulation made of high density mineral wool 25 mm thickness, pressed and interposed between the walls without connecting elements between the same (thermal junction). The modular elements have classic male-female junction calibrated for both sides, with triple seal lip gasket, conforming to European standard EN 14241-1, and mechanical connection with locking clamp.

SISTEMA DOPPIA PARETE SDW50

Il sistema **doppia parete SDW50** è composto da elementi componibili rigidi con finitura lucida BA, realizzati con parete interna in acciaio inox AISI 316L di spessore minimo 0,4 mm e parete esterna in acciaio inox AISI 304, conformi agli standard previsti dalla marcatura CE secondo la normativa EN 1856/1. La coibentazione è realizzata in lana minerale ad alta densità di spessore 50 mm, pressata ed interposta tra le pareti senza elementi di giunzione tra le stesse (ponte termico). Gli elementi modulari hanno innesto classico a bicchiere maschio-femmina calibrato per entrambi le pareti con guarnizione di tenuta a triplice labbro da inserire sulla parete interna, conforme alla normativa europea EN 14241-1, e giunzione meccanica con fascetta di sicurezza.

DOUBLE WALL SDW50 SYSTEM

Double wall SDW50 system is composed by modular rigid elements with BA surface finish, made with the inner wall of stainless steel AISI 316L minimum thickness of 0.4 mm and outer wall in stainless steel AISI 304, according to the standards set out by the European CE mark, EN 1856/1. Insulation made of high density mineral wool 50 mm thickness, pressed and interposed between the walls without connecting elements between the same (thermal junction). The modular elements have classic male-female junction calibrated for both sides, with triple seal lip gasket, conforming to European standard EN 14241-1, and mechanical connection with locking clamp.
